Subject: Swiss appraisal Final Project Proposal KIK-44 "Enhanced utilization of renewable energy sources and improved quality of air in the areas of Natura 2000 in the Suski Poviast"

Dear Mr. Dyrzcz,

The respective Final Project Proposal documentation for this project was approved by the Polish authorities and sent to the Swiss partner in late fall 2010. Currently, the respective Swiss institutions are thoroughly assessing this proposal. A decision on the operational management level of the State Secretariat for Economic Affairs is expected for end-February. However, given the large project amount, the final financial decision is to be made by the Minister of Economy of Switzerland. We hope that the signature of the Minister can be given until end-March (obviously only for the case the outcome of the assessment process is positive).

I suggest that once the decision is taken by SECO on operational level, the partners should immediately start to work on the Project Agreement, as well as on the Project Implementation Agreement. This way, much time could be gained.

I trust you find this information useful.

Yours sincerely,

Heinz Kaufmann
Dyrektor Biura Szwajcarsko-Polskiego Programu Współpracy
